

Thank you for your interest in participating in Publix Super Markets' small project construction program.

Publix continually updates and improves its stores through a variety of small projects including tenant build-outs, department remodels and maintenance upgrades.

With over 1,200 stores across seven states, we occasionally have opportunities to add new contractors to help execute this work.

If you would like to be considered as a prospective approved contractor, please complete the following preliminary application and email it to: GCapplication@publix.com

If your company meets the preliminary requirements, you may be invited to further engage in the contractor qualification process. If Publix does not currently have a need in your service area, we will retain your preliminary application for future consideration.

Thank you again for your interest.

Sincerely,

Mikhael H. Ser, P.E.
Director of Construction
Publix Super Markets, Inc.
